BATHROOM & WET-AREA SURFACES

CONCRETTA WS

A fresh look for your bathroom.

Your choice of colour. A coordinated look across surfaces.

CONCRETTA WS

WALL · FLOOR · DETAIL

ABOUT CONCRETTA WS

Refresh your bathroom with your choice of colour and mineral texture. Concretta WS brings a consistent appearance to walls and floors; the surface and protective layers are planned for the area.

Suitable existing tiles may be renewed after surface checks. In wet areas, waterproofing, drains, corners and joints must be addressed before coating.

01 / BENEFITS

A fresh look for wet areas.

Which kit suits your space? Measure the area and share a surface photo so we can plan the kit and preparation.

01 MATCHING WALLS AND FLOORS

The same mineral look can continue across walls, floors and details.

02 RENEWING EXISTING TILES

Stable, suitable tiles can be assessed for renewal after the necessary preparation.

03 COLOUR AND TEXTURE

Light, warm or dark tones can be chosen for your lighting and preferred appearance.

04 KIT OPTIONS

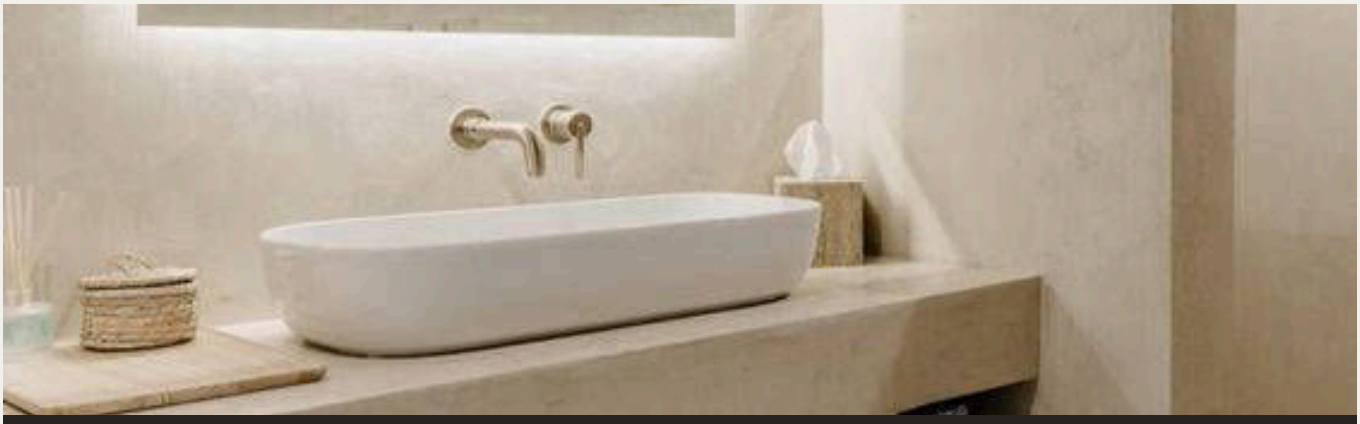

Kits are available for 5, 10 and 20 m². Quantities depend on the area and surface condition.

05 A COMPLETE LAYER SYSTEM

Primer, coating and surface protector are applied together to complete the system.

06 EVERYDAY CARE

Plan everyday care with suitable protective coats and surface-compatible cleaning products.

ONE MINERAL SURFACE LANGUAGE

02 / SURFACE PALETTE

Colour, texture and detail.

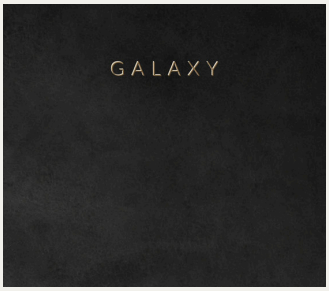

Selected palette tones. Make your final choice using a real colour sample.

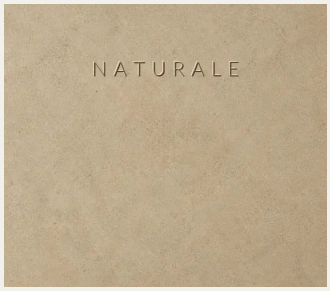

BEFORE CHOOSING YOUR SURFACE

Existing surface	Check that the surface is stable, even and suitable for coating.
Waterproofing	Complete the required waterproofing and drain, corner and joint details first.
Surface protector	Apply Sealer and U-Sealer for the area's water contact and use conditions.
Everyday care	Use a soft cloth and suitable cleaning products. Avoid abrasive pads.

Concretta WS is a decorative coating. It does not replace required waterproofing or junction details.

03 / APPLICATION PROCESS

A considered surface, step by step.

Five key stages; follow the application guide for product details.

01

Prepare the surface

Clean the surface. Make sure it is stable, dry and even.

Surface checks

02

Check the waterproofing

Complete the required waterproofing at drains, corners and joints before coating.

Waterproofing and junctions

03

Apply the primer

Apply a suitable primer evenly and allow it to dry.

Primer

04

Apply the coating

Apply the base coat and two thin finishing coats. Once dry, sand lightly and remove the dust.

Basecoat / Finishcoat

05

Apply the protector

Apply Sealer and U-Sealer. Allow the product to cure fully before water exposure.

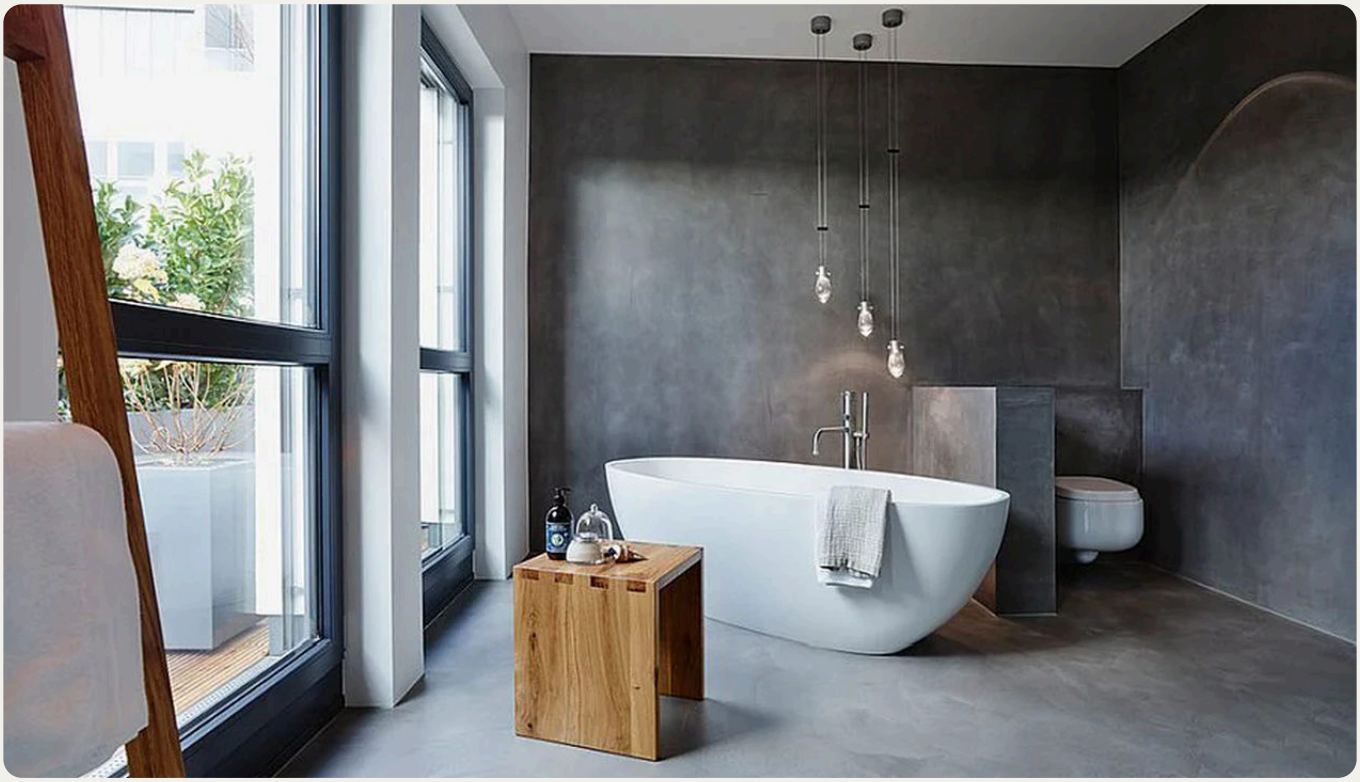

Sealer / U-Sealer

This page is a summary. Follow the application guide for mixing ratios, coat quantities and drying times.

04 / APPLICATION EXAMPLES

Surfaces in living spaces.

Colour and texture, from the whole room to the smallest detail.

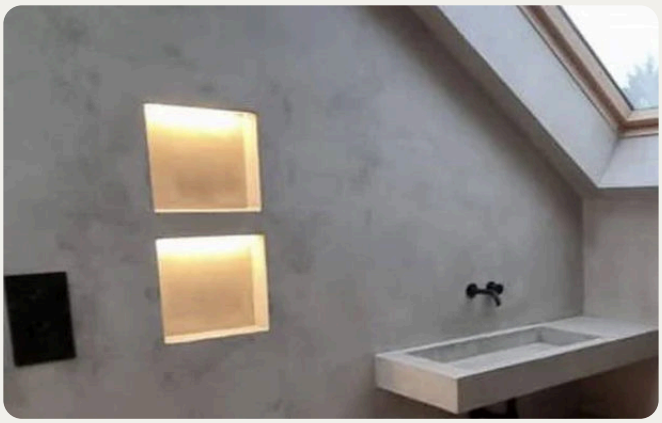

A coordinated bathroom

A consistent palette across walls and floors.

Shower walls

Mineral texture in natural light.

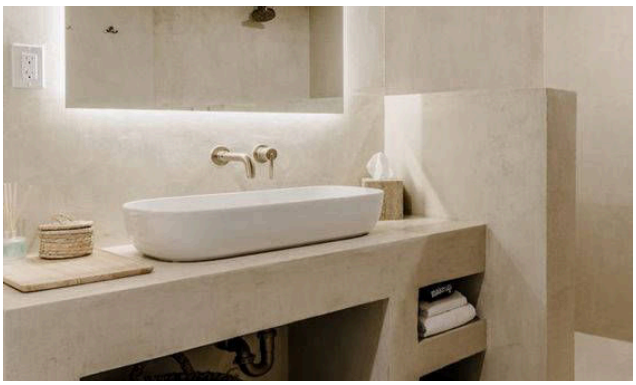

Niches and details

A shared character across adjoining surfaces.

05 / YOUR PROJECT

For your bathroom.

Choose a colour, share your surface and let us identify your kit.
