THE ART OF CONCRETE

## C-Design | Microcement

With its soft lines and uninterrupted appearance, it was inspired by classic concrete-looking floors. Although it has darker or lighter areas depending on the pattern density, it has a generally balanced structure. Its matte texture and gray tone harmonize with all kinds of materials and provide aesthetic results in all types of applications. Concretta Design is a product formulated for cafe, office, bathroom, home decoration, interior and exterior floor and wall coverings, which can be applied on any floor with a thickness of 2-3 mm. Its waterproof feature is non-slip, especially in bathrooms and kitchens. Its feature provides great ease of use in outdoor areas.

Internal uses; bathroom, kitchen, home living areas, offices, shops, restaurants, etc.

External uses; walkways, building entrances, galleries, pool sides, building exterior ..On the floor: Old concrete, ceramic, marble, parquet, mosaic etc. can be coated on it.On the wall: Gypsum plaster, gypsum board, black plaster, ceramic, etc. can be coated on it.Concretta is the perfect option for those who want to offer unique design elements and a contemporary finish to their application

Trust your creativity...

Concretta is ideal for quick renovation projects as it does not require removing existing surfaces, thus saving both time and money.

## C-Furniture | Concrete Furniture

When people hear "concrete furniture" they often think it will be extremely heavy, these ugly things are only suitable for sitting in parks and bus stops. However, today most people realize that modern concrete furniture can be more elegant, light and much more durable than other furniture materials ... The reason why furniture covered with decorative concrete appearance is a great material is its incredible functionality and aesthetic appearance.

Let them be unique...

Easy application which saves time and money because: There is no need to remove existing material to apply due to its great adhesive capacity. It can be applied to cement, concrete, metal, plastic, asphalt, terrazzo and ceramic.

## C-Panel | Concrete Panel

Concrete means freedom, limitlessness and breaking the routine. Our concrete series, which suits loft style spaces with industrial setups, creates a rebellious attitude in the space when used with a color palette dominated by contemporary forms, black and white and gray tones. C-Panel is 7 mm thick composite panels made of pure cement, quartz and organic materials. Our panels, which are used for quick solutions on the interior and exterior decorative, and produced in A1 non-flammability class due to their raw materials, can be mounted on the existing surface and produce impressive solutions in a short time.

C-Panel suitable for indoor or outdoor applications

## C-Oxido

It is an acidic system used for rusting concrete surfaces. When applied, it gives the appearance of iron or rusty stone.

All floor applications use a fiberglass mesh for strength and cohesion, ensuring greater durability and minimizing the risk of cracks rising from the base. Cementox can be attached with absolute firmness to concrete, metal, plastic, asphalt, terrazzo and even smooth ceramic.

## C-Ultima

Concretta Ultima is specially produced for areas that are open to freight and human traffic, such as factories, airports, industrial, storage facilities, shopping malls. They are easy to apply and fast to be used. They are products with high pressure resistance (40 mPA). Suitable for heavy load traffic, long life. It is a dust-free, crack-proof and dirt-repellent floor solution. Internal uses; factories, industrial facilities, storage areas, shopping malls, airports, etc. External uses; walkways, building entrances, galleries, pool sides, building exterior .. On the ground: Old concrete, ceramic, marble, parquet, mosaic etc. can be coated on it.

Home is  
not a place  
it's a  
feeling.
