Concretta Technical Data

•What is Concretta

Concretta is a cement-based coating that can be applied thinly (approx. 1-3 mm) to a range of different surfaces including tiles and wood. It provides a hygienic and stain-free surface for bathrooms and kitchens. Concretta is non-slip and mildew-free - a great choice for interior and exterior floor, wall, furniture surfaces.

•Why is Concretta used?

Ready Packaging

Concretta comes in a packaged mix.

Dries fast

Concretta dries quickly after application and this speed gives you extra time to complete your projects. No need for expensive and professional tools for its application.

•What are the main advantages of Concretta?

Concretta has been used in many applications, both residential and commercial. It has been used for items such as surfaces and shelves, providing a seamless, durable and contemporary surface.

It is durable and can be easily applied to interior and exterior surfaces. It is a great option for those who want to add cost-effective hard wearing concrete to floors or walls anywhere. It is also an ideal material for kitchens and bathrooms.

Concretta is a versatile product available in a variety of textures, shades and colors.

All in all, Concretta is a great option for those who want to create unique designs and put a modern finish to their application.

• How is Concretta applied?

Concretta does not require special application skills or machinery. Surface Preparation

The first stage of Cementox application is surface preparation. The surface to be coated is a flat surface, free of cleaned gravel, sand and dust.there must be a surface.

Mixing

Concretta can be mixed by hand, but in large projects it is easier to use a mixing bowl if needed. The amount of water needed depends on the mixture. Water should be added slowly while mixing Concretta. Application

It is important to apply immediately after mixing is complete. Then, using clean tools, easily smooth the mixture and let it dry.

Concretta is a great material that you can use in the surface selection of your projects.

SAVE TIMES; With Concretta, there is no need to remove the existing surface. It shows high adherence even to surfaces that are difficult to hold such as ceramic, mosaic, epoxy and steel and can be easily coated.

Dries quickly; It becomes usable after 3 hours

ENVIRONMENT-FRIENDLY; It is suitable for recycling.

SUITABLE FOR HEAVY CARGO TRAFFIC; They are products with high pressure resistance (40 mPA). Thanks to their low shrinkage feature, they do not crack by themselves. Strong floors without dust are obtained. It is long-lasting.

CAN BE APPLIED IN MANY COLORS; It is decorative, harmonious with today's architectural approach with its natural patterns and uninterrupted gross images.

PRODUCES ALTERNATIVE SOLUTIONS; It is possible to create a level solution in thin layers as 1-3 mm coatings or to balance problematic levels with filling layers on the same day.

Concretta;

INDUSTRIAL FACILITIES, STORAGE AREAS, OFFICES, RESIDENCES AND COMMERCIAL AREAS SUCH AS GALLERIES, SHOP, SHOW-ROOM, FURNITURE, KITCHEN COUNTERS, INTERIOR AND EXTERIOR SURFACES, EXTERIOR WALLS AND WALLS.

Concretta Concrete Panel Technical Information

What is C-Panel?

C-Panels made of pure cement, quartz and organic materials. Since it is cement based, it is 100% odorless and has no health risk. Naturally, it is Class A Fireproof due to its raw material. The main method of mounting is gluing, screw support can be made. It is easy to machine and cut with carpenter tools. Special inherent surface protection prevents concrete dust.

Easy to Install

C-Panels are quick and easy to install thanks to easy-to-use adhesives and fixings. This helps reduce construction time and enables customers to install the panels themselves.

Panel Size

Ready-to-use concrete panel ...

Series products 60 cm x 120 cm.

Thickness 7-11 mm (+ - 10%) weight 8-15 kg / m².

Special size production is possible.

It is possible to color.

Usage areas...

Interior and exterior.
